M1A2+ Shot Timer

1. PROFILE

M1A2+ shot timer is the new generation device that uses the latest technology to realize the accurate timing and wireless connection to other devices includes big led score display, argus camera and SC9 chronograph via RF and Bluetooth.

M1A2+ is designed to improve shooting skills. Whether you are in law enforcement, the military, or an IPSC/IDPA/3GUNS competitive shooter.

Moreover, it is the official timer for the IPSC level 4 and 5 matches due to its outstanding features, including but not limited to long Bluetooth transmission distance, walkthrough mode, waterproof and drop proof.

So it has been the preferred option for most shooting associations and international shooting competitions around the world.

2. FUNCTIONS

Three in One function, it is not only a **firearm shot timer**, a **stopwatch**, and also a **countdown timer**.

3. FEATURES

3.1 Automatic Backlight Screen.

After registering the gunshots, the screen will light automatically. This makes the data showing on screen clear to read and suitable for outdoor use under strong light conditions.

3.2 Automatic echo filtering.

In enclosed indoor environments, noise interference such as echoes, are automatically eliminated to ensure accurate timing.

3.3 Quick access key.

- I. When not in timing mode, press the quick set button for 3 seconds to enter the sound volume and sensitivity adjustment page.

II. Then press the **History button** for 2 secs to quickly check group scores.

III. To quickly turn on/off “Par” mode, press the **"+" button** for 3 secs.

IV. To quickly begin the countdown function, press **"-" button** for 3 secs.

It is often used in walkthrough of stages before competition and the

limited time event of shooting competition. The longest countdown time is 600 seconds.

3.4 Automatic shutdown.

Support customized the auto shutdown time under eco mode to save power.

3.5 Free Belt Clip and Lanyard

With belt clip and lanyard, timer can be clipped to the belt or hung on the chest/hand/backpack. It will be convenient for shooters and Ros to carry timer.

3.6 Updated Bluetooth & Wireless Transmission.

-Stronger Bluetooth Signal, support data transfer to PractiScore APP and IPSC ESS Software in 15 meters. Bluetooth connects to our SC9 Chrono and Argus Camera to synchronize data.

-Wireless timer can connect to big LED score board, flexible score led board making data easier to be seen at the shooting range and competitions.

3.7 Longer battery life.

The battery was enlarged to 1000mAH which enables continuous working for 50 hours. Change Micro USB charging port to USB-C, more friendly to charge.

3.8 Wider range beep modes.

Wider range beep modes from low to high frequency beep sound which not only suitable for most shooters but also shooters with hearing impairment.

3.9 Support 9 languages

English, French, Portuguese, Spanish, Russian, German, Italian, Japanese and Chinese.

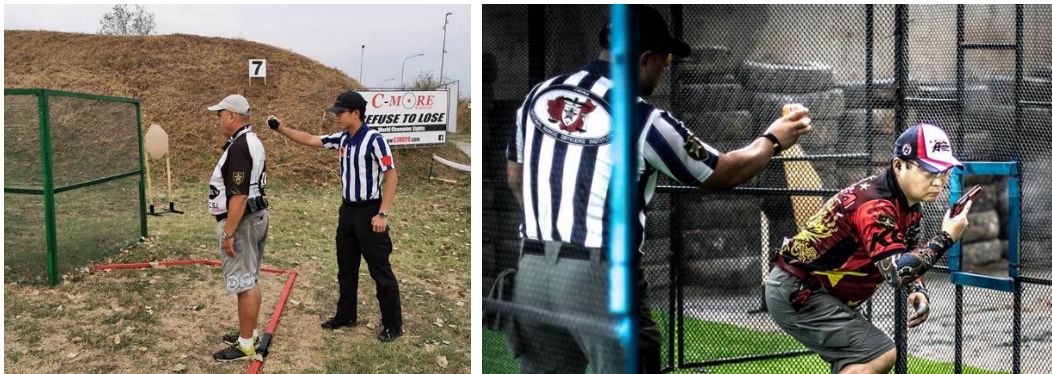

4. Application

Our timer has been used in a wide range of sports shooting training, military and police shooting training, IPSC, IDPA competitions around the world.
